

## Berger Product Information

### Processing instructions "walltex" 4235-60 Canvas Rubens

In general: "Walltex" Canvas Rubens is a printable textile wallpaper for interior decoration, which can be printed with solvent, eco-solvent, latex and UV-inks. It's a special coated shock-proof polyester-/cotton mixture. This textile wallpaper can be washed off and the material as such is simple and safe to handle. It's absolutely PVC-free with a weight of approx. 300 g/m<sup>2</sup>.

Processing: This product can basically be handled like normal, standard, heavy wallpaper. For gluing it is recommended to use paste made for heavy wallpapers. To add Ovalit T (approx. 20%) can be helpful. Some tests would be necessary. During the gluing process we furthermore recommend to leave approx. 3cm excess width which can be cut upon completion. By proceeding like this proper edges will be achieved and it can be avoided that at the edges the background is shining through. This method of operation is probably well known when you lay a carpet.

Removal: Removal of this wallpaper is more than simple, after removal there are hardly no residues remaining on the ground.

**It is important to point out that the price-performance ratio of this material is more than favourable.**

- weight approx. 300 g/m<sup>2</sup>
- Cotton 60% / Polyester 40%
- rough linnen texture
- PVC-free
- very easy to handle
- removing residue-free
- shock proof
- can be washed off
