

Berger Product Information

Processing instruction "walltex" 4280-77 Universal Display 250

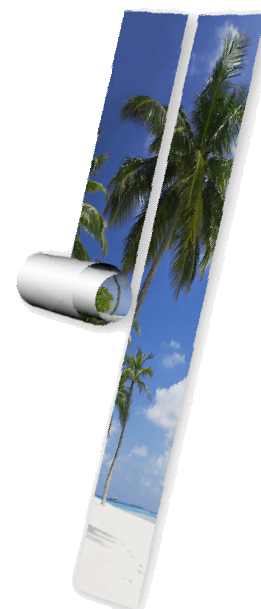

In general: "Walltex" Universal Display 250 is a printable textile wallpaper for interior decoration, which can be printed with solvent, eco-solvent, latex and UV-inks. It's a shock-proof special coated polyester fabric. The coated side of this textile wallpaper is easy to wash off and the material as such is simple and safe to handle. It's absolutely PVC-free with a weight of approx. 250 g/m² and it's achieving the flammability rating B1 certified acc. to German standard DIN 4102.

Processing: This product can basically be handled like normal, standard, heavy wallpaper. To avoid that the background is shining through, it should be prime coated first. For gluing it is recommended to use paste made for heavy wallpapers. To add Ovalit T (approx. 20%) can be helpful. Some tests would be necessary. During the gluing process we furthermore recommend to leave approx. 3cm excess width which can be cut upon completion. By proceeding like this proper edges will be achieved and it can be avoided that the background is shining through.

Removal: Removal of this wallpaper is more than simple, after removal there are hardly no residues remaining on the ground.

Among others the good processability is to be pointed out as well as a residue-free recycling of this material.

- weight approx. 250 g/m²
- Polyester
- fine sand texture
- PVC-free
- very easy to handle
- removing residue-free
- flame-retardant acc. to B1
- easy to wash off on the coated side
- printable
